09.11.2012

Suceava, Romania

Aim of the meeting

Discussions between the participants to this workshop organized by USV, Faculty of Mechanical Engineering, Mechatronics and Management in order to bring a contribution to better understanding of the relationship between engineering, management, commerce and business.

The European project TOM, carried between 2010-2013, has created a required environment in order to understand such programs in many European universities.

The attractiveness of such study programs for students and business environment has led to recent setting up of such study programs in the universities partners in this project.

The workshop aims to debate the European outlook on such study programs.

Workshop Topics

- Engineering and Management at Universitatea Ștefan cel Mare, Suceava, Romania
- Engineering and Commerce at Université Claude Bernard LYON 1, France
- Engineering and Management at Katholieke Hogeschool Sint-Lieven, Gent, Belgium
